

# EXHIBIT C

**Exhibit 4 - U.S. Patent No. 9,198,042 (“042 Patent”)**

Accused Instrumentalities: smartphones, basic phones, tablets, laptops, and hotspot devices sold (including those sold in bundles with data plans) or used by AT&T for use with AT&T’s wireless network services, and all versions and variations thereof since the issuance of the asserted patent.

**Claim 1**

Issued Claim(s)	Public Documentation
1. A method comprising:	To the extent the preamble is limiting, AT&T’s Accused Instrumentalities practice the steps of a method as set forth in the limitations below.
1[a] receiving, over a service control link, a report from a wireless end-user device, the report comprising information about a device service state;	The Accused Instrumentalities comprise receiving, over a service control link, a report from a wireless end-user device, the report comprising information about a device service state. AT&T offers telecommunications service plans to customers that are provided through various network elements such as telecommunications base stations and cell sites, edge servers, and other telecommunications servers. AT&T provides various network service plans to customers for purchase, including through the ATT.com website as well as through AT&T-provided services such as its pre-paid mobile service category, Prepaid by AT&T. <i>See, e.g.:</i>

## AT&T Prepaid Add-On Data

AT&T's Prepaid Data add-on is for those on limited data plans who want to add more. The prices for the various limited data plans include:

- \$25 Prepaid Plan: \$5 for 250MB
- \$30 Prepaid Plan: \$10 for 1GB
- \$40 Prepaid Plan: \$10 for 1GB or \$20 for 3GB

Each of these monthly plan data add-ons is good for 30 days. AT&T also offers a prepaid daily plan as opposed to monthly—this plan, which includes unlimited talk and text, costs \$2/day and you are only charged on the days that you use your phone. Those on this \$2 daily plan can add 100MB for \$1, which is good for 24 hours. In order to buy a data add-on, visit your AT&T Prepaid login at [att.com/myprepaid](http://att.com/myprepaid).

AT&T's network receives service plan information from devices which correspond to the subscriber service plan associated with that wireless end-user device, which is a report comprising information about a device service state. For example, AT&T's network receives an attach request, bearer resource allocation request, bearer resource modification request, or PDN connectivity request from a wireless end-user device (UE), which includes a report comprising information about the UE's service state such as UE network capability, UE status, and protocol configuration options (PCO):
